## PROJECTS

### Attentive

[View project](#)

A real-time video calling app that takes attendance using facial recognition. It is a video calling app designed especially for educational purposes.

### TuneInAI

[GitHub](#)

An AI intelligent music player that recommends songs based on your mood. Built using ReactJS, the music app detects your mood with the help of face-api.js and recommends songs accordingly.

### Jagriti App

[GitHub](#)

An app for my social startup, Jagriti Foundation, aims at spreading awareness among the underprivileged regarding the government schemes and NGOs scheme trying to bring a long-term impact on society while helping them with a donation to help them at the same time.
