PROJECTS

Attentive

[GitHub](#) [View project](#)

A real-time video calling app that takes attendance using facial recognition. It is a video calling app designed especially for educational purposes.

ZoomoBot

[GitHub](#)

ZoomoBot is a python bot that takes attendance in Zoom meetings automatically. The bot takes the name list in an excel file or a text file and exports the attendance in text files. It can even mark attendance in an Excel file for the ease of maintaining records.

Jagriti App

[GitHub](#)

An app for my social startup, Jagriti Foundation, aims at spreading awareness among the underprivileged regarding the government schemes and NGOs scheme trying to bring a long-term impact on society while helping them with a donation to help them at the same time.
